

## **ENVS 3020 *The Environmental Policy Process* (AY16/17)**

AY16/17

### **PLO#2 Sustainability**

Examine the social, ecological, ethical and economic dimensions of sustainability, use system-based thinking to understand the interaction between humans and nature, evaluate the role of science and technology, and explore potential solutions at individual, local, and global levels.

- Details/Description: DIRECT -- EXAM (Spring 2017) based on a sample of six questions from midterm exam
- Acceptable Target: Unacceptable (BELOW): The percentage of students who correctly answered 75% of the six questions is below 50%
  - Acceptable (MET): The percentage of students who correctly answered 75% of the sample of six questions is equal to 50%
  - Exemplary (EXCEEDED): The percentage of the students who correctly answered 75% of the six questions is above 50%
- Ideal Target: All students correctly answer 75% or more of the six exam questions within the sample
- Recommendations:
  - Acceptable Target Achievement: Exceeded
  - Ideal Target Achievement : Approaching
- Reflection:
  - Use the scores on the weekly quizzes to help identify those students who might fall into the lower 30% of the class and encourage them to keep up with reading and offer incentives for them to work earlier and focus more completely on the study guide that is offered to all students 2 weeks prior to the exam.
