ACCT 2000   Principles of Accounting I

An introduction to fundamental accounting principles that include: the accounting cycle, records, classification of accounts, financial statements, accounting aids to internal control; current assets and liabilities; depreciation accounting; payroll accounting; accounting principles; and partnerships.

ACCT 2010   Principles of Accounting II

An emphasis on the elements of accounting for corporations. Topics covered include: long-term liabilities; statement of cash flows; introduction to manufacturing accounting; and cost-volume profit analysis.
NOTE: This course has a pre-requisite requirement of ACCT 2000.

ANTH 2000 Cultural Anthropology

A general introduction to cultural anthropology. Topics covered include: the nature of culture, basic concepts for analyzing cultural behavior, and consideration of the effects of culture upon the individual and society.

ARTS 1000   Introduction to Visual Arts

An introductory visual arts course covering elements of art, principles of design, and the creative process. Major historical movements in art are covered as well as student expressions in various visual media and forms. Lectures and studio demonstrations.

BIOL 1000   Introductory Biology

An introductory survey of the major areas of the biological sciences designed to equip students with information enabling them to make rational, informed decisions about biologically relevant issues. The course includes topics such as cell structure and function, metabolism, mitosis and meiosis, protein synthesis, evolution, animal diversity, anatomy and physiology, ecology, and conservation biology.

CJ 1500   Introduction to Cybersecurity

This course explores developments and changes in the practice of criminal justice brought about by technology and crime as well as the rapid technological change in computers and other internet access devices. Specific topics include: cybercrime, overview of the concepts and investigative requirements when dealing with cybersecurity, globalization of cybersecurity investigations, how different cybercrimes are committed, the rapid evolution of technology and its effects on crime, cybercrimes against persons, and criminal justice agencies involved in the investigation and prevention of cybercrimes.

CSCI 1041   Digital Literacy in a Global Society

This course gives students tools to be active participants in today's global culture of digital literacy. Students will learn current technology for acquiring, analyzing, and sharing information; analytical skills to understand, organize, and analyze numeric and graphic data; and communication skills to convey information in a context appropriate to the receiving audience. Readings will initiate discussions of technology issues such as: cybersecurity, addiction to social media, ethics and privacy, and intellectual property issues in a global society. The course is presented in a global context with local details drawn from a variety of countries and cultures.

CYBS 2201   Fundamentals of Cybersecurity

This course introduces preventive methods to protect information by understanding potential threats, vulnerability assessment, spyware, hacking, viruses, and malicious attacks. The course covers strategies including identity, risk, and incident management.

CYBS 2202   Fundamentals of Network Security

An overview of the underlying concepts of computer network security including local area network (LAN), server administration, routers, switches, firewalls, and tools to monitor internal/external network security, availability, and performance.

CYBS 2220   CompTIA Network +

The course will provide the knowledge and skills required to troubleshoot, configure, and manage common network wireless and wired devices, establish basic network design and connectivity, understand and maintain network documentation, identify network limitations and weaknesses, and implement network security, standards, and protocols. The candidate will have a basic understanding of emerging technologies including unified communications, mobile, cloud, and virtualization technologies. The course is designed to help you prepare for the Comp TIA Network+ (N 10-007) Certification Exam.

ECON 2015   Principles of Macroeconomics

A general introduction to macroeconomics, the study of the aggregate economy. This course examines: how levels of output, employment, interest rates, and prices in a nation are interrelated; what causes these levels to change; and the use of policy measures to regulate them.

ENG 1101   Representations of Pacific Life

This course introduces students to selected texts from some of the many cultures of Oceania and to the critical skills they will need to get the most out of these cultural productions. It focuses on an overview of Oceanic literature, emphasizing prose fiction, poetry, drama, and other genres such as journalism, film, and media.

ENVS 1000   The Sustainability Challenge

What is sustainability and what challenges are we facing now and in the future? What is my impact and what can I do about it? In the course, students will learn about the "three-legged stool" (economic, environmental, and social) of sustainability and how to use systems thinking to better understand the complex natural and human systems we rely upon for food, water, energy, business, etc. Students will "take the sustainability challenge" and measure their own current impacts and compare them to their impacts after taking actions to be more sustainable. The collective results will then be used to propose action plans to inspire others on campus and in the broader community to do the same.

HIST 1001   Traditions and Encounters: World Cultures to 1500

This course is an interpretative survey of the development of cultures from prehistoric times to A.D. 1500. Students will analyze the characteristics of human societies, explore how human cultures have interacted with each other over time, and investigate the evolution of global exchange and the ideas, concepts, and phenomena that have connected and divided people across regional boundaries and time.

HIST 1002   Global Crossroads: 1500 to Present

This course engages students in the study of modern world history in order to achieve a more critical and integrated understanding of global societies and cultures during the past five hundred years. Students will explore developments in Africa, Asia, the Americas, and Europe; consider the interaction of the West and non-West and the eventual domination of the West after 1750; investigate the origins and outcomes of world war, revolution, and genocide in the 20th century; trace the disintegration of western empires after World War II; and ponder the global challenges of the post-Cold War era.

HRD 1000   Introduction to Human Resource Development
An introduction to major components of human resource development (HRD). This course investigates the roles of HRD practitioners and develops an understanding of HRD theories, principles, and practices.

HRD 2000   Integrated Talent Management
This course will explore the key elements of effective talent management. Topics include best practices in talent acquisition, performance management, learning and development, and succession management.
NOTE: This course has a pre-requisite requirement of HRD 1000.

JPE 1100   Beginning Japanese I
An introduction to written and spoken Japanese, as well as Japanese culture. This is the first semester of a two-semester sequence.

JPE 1200   Beginning Japanese II
An introduction to written and spoken Japanese, as well as Japanese Culture. This is the second semester of a two-semester sequence.
NOTE: This course has a pre-requisite requirement of JPE 1100.

MARS 1000 Introductory Oceanography
An elementary survey of the geology, chemistry, physics, and biology of the oceans. Topics include: ocean basin morphology, plate tectonics, sedimentation, major and minor components of seawater, ocean circulation, waves, tides, plankton, nekton, and benthic organisms.

MATH 1123 Statistics
This course provides an introduction to descriptive and inferential statistics. Topics include describing, summarizing, and displaying data; using sample statistics to estimate population parameters; evaluating hypothesis using confidence levels with application to the physical and social sciences; logically drawing conclusions based on statistical procedures; and quantifying the possibility of error and bias.

MGMT 3910 Topics: Global Data I
The Global Data program provides students from all majors with the opportunity to learn in-demand data skills using international company case studies. Focus: Introduction to Applied Data Analytics with Excel.

MGMT 3910 Topics: Global Data II
The Global Data program provides students from all majors with the opportunity to learn in-demand data skills using international company case studies. Focus: Data Visualization with Tableau.

MIS 2000   Information Tools for Business

In this hands-on course you will learn to use the tools of a knowledge worker to help you take raw data and transform it into compelling information to be used for business decision making. You will sharpen your analytical and problem-solving skills using spreadsheet and database software. You will also be exposed to the tools and best practices for communicating your information using tables, charts, and graphs. Upon successful completion of this course you will have the basic technical skills to be more productive in your future business courses as well as in an actual business environment.

MIS 3910   Topics: Global Coding I

The International Coding program provides students from all majors with an introduction to web design and development using best of breed software tools and languages. Focus: Web Design with responsive HTML, CSS & Bootstrap.

MIS 3910   Topics: Global Coding II

The International Coding program provides students from all majors with an introduction to web design and development using best of breed software tools and languages. Focus: Web Dev with Javascript and APIs.

MKTG 3910 Topics: Global E-commerce I

The International Marketing program provides students from all majors with an introduction to cutting-edge techniques in E-commerce and customer acquisition. Focus: Introduction to E-commerce Marketing with Shopify.

MKTG 3910 Topics: Global E-commerce II

The International Marketing program provides students from all majors with an introduction to cutting-edge techniques in E-commerce and customer acquisition. Focus: Customer Acquisition with Google and Instagram.

MUS 1000   Introduction to Western Classical Music

An introductory exploration of the evolution of Western classical music (WCM) from the Middle Ages to the present in relation to the background of life and art. Major historical movements in WCM are covered as well as the basics of reading western music notation. In addition, the impact and influence of non-western music on WCM will be examined.

PADM 1000 Introduction to Leadership in America

This course is an introduction to the study of leadership in America. It compares the administrative processes used in private and non-profit organizations and the U.S. government, including the U.S. military. This course introduces students to the theories of leadership and the styles, traits, and myths of leadership including the history, cultures, and ethical basis for good leadership in an American context.

PH 2060   Comparative Healthcare Systems

This course will compare and contrast the provision, funding, and governance of healthcare programs across a variety of healthcare systems around the world. Students will examine the advantages and disadvantages of the different major healthcare systems such as national health services, social

insurance, and private insurance. Primary care, curative medicine, and chronic care will also be explored. This course will study healthcare systems from several countries (e.g., United States, Australia, Singapore, Germany, Japan, Netherlands, Taiwan, Britain, New Zealand, Sweden, Canada, Russia, Korea, India, Nigeria, Mexico, and the Philippines).

PSCI 1400   American Politics

An analysis of the American political system. Topics include the central theme of democracy in American politics as well as structural factors including the Constitution, our federal system, media, public opinion, interest groups, and social movements. Additional topics deal with how federal institutions such as the Congress, the presidency, the bureaucracy, and the Supreme Court work. The course looks at federal policy in civil rights and liberties, the economy, social welfare, foreign policy, and national defense.

PSCI 2000   Introduction to Politics

This course is designed to help the student better understand the political world. It surveys the central analytical concepts of political science that help explain the realities of the political world in the early 21st century. The level of analysis ranges from the individual's political beliefs and actions to the political orientations of groups and states, as well as the dynamics of the international political system.

PSY 1000   Introduction to Psychology

An introductory course in psychology, covering the major processes underlying human behavior, cognition, and emotion. Specific units covered include: consciousness, sensation and perception, thought and language, human development, personality, social psychology, abnormal psychology, and the realization of human potential.

WRI 2601   Introduction to Creative Writing

In this course students will analyze and practice fundamental techniques of the major genres of creative writing. Students will study and work in all or most of the following genres: fiction, poetry, drama, and creative nonfiction. For each of the genres covered, students will be expected to produce a draft original work to be workshopped by their peers.
